

AND recommends that the safety tether be used to prevent personal injury due to accidental frame disengagement. The following installation instructions should be followed:

- 1. Remove lower right mounting screw from enclosure.**
- 2. Place open end of tether wire over the lower right mounting hole and thread the screw into the enclosure. Tighten screw fully to secure the tether to the mounted enclosure.**
- 3. Place the wood frame over the mounted device. Push the frame as far back toward the wall as possible. The magnets should be engaged along the top of the device frame.**
