SOFTWARE OPTIONS

AND devices can operate standalone. They do not require external software for atomic timekeeping or sending text messages from the device's web server. However, you can use application software to take advantage of the device capabilities, and then integrate the devices into applications like a mass notification system, a phone network, etc.

**AND IPClockWise (Developed and Supported by AND)**
- Instantly finds and provides controls for all of your AND devices.
- Provides a clock / alarm feature that supports scheduling events, alarms, stopwatch, and timer, with an optional sound library.
- Sends News / RSS / Twitter / Weather / Stock Feeds, etc. messages to AND devices with a display.

Third-Party Software
- AND maintains a long-standing relationship with various third party software providers.
- AND devices support Informacast (Singlewire), SA-Announce (Syn-Apps), IPSession (IPCelerate), MessageNet Systems, BellComander (Acro Vista), and others.
- AND devices will work with SIP-compatible products/PBX, such as Asterisk, 3CX, ShoreTel, etc.

NOTE: AND IPClockwise and third party software can run concurrently
